PREFACE

This report presents statistics on the number of inhabitants of the State, its counties, and minor civil divisions (townships, etc.). In addition, separate figures are also presented for urban places, wards of cities of 5,000 or more, and other areas of the State. These data are based upon tabulations from the Seventeenth Decennial Census of the population of the United States, its Territories, and possessions conducted as of April 1, 1950. Provision for the Seventeenth Decennial Census was made in the act providing for the Fifteenth and subsequent decennial censuses which was approved on June 18, 1929.

The major portion of the information compiled from the Census of Population of 1950 will appear in Volume I, *Number of Inhabitants*, and in Volume II, *Characteristics of the Population*. This report is a preprint of Chapter 9 (District of Columbia) of Volume I, which is to present, in a single publication, statistics on the number of inhabitants for each State.

The materials presented here will also appear as Chapter A of Part 9 (District of Columbia) of Volume II. Volume II will comprise a series of separately published parts, one for each State and a summary for the United States. The use of separate parts makes the basic materials on characteristics of the population for a given State available to the public in a single publication. Within the part for a State, Chapter A will recapitulate the statistics on the number and distribution of the population within a State; Chapter B will present statistics on the general characteristics of the population of the various political subdivisions of the State, such as counties, incorporated places, and the like; and Chapter C will present data on the detailed characteristics of the population of the larger areas within the State, such as cities of 100,000 inhabitants or more and standard metropolitan areas.

The materials presented here were prepared under the supervision of Howard G. Brunsman, Chief, Population and Housing Division, and Dr. Henry S. Shryock, Jr., Assistant Chief for Population Statistics, by Dr. Henry D. Sheldon, Chief, Demographic Statistics Section, and Charles P. Brinkman, Chief, Distribution Unit; the compilation of the statistics was under the direction of Robert B. Voight, Assistant Chief for Operations. The collection of the information on which these statistics are based was under the supervision of Lowell T. Galt, Chief, Field Division. The geographic work, including the delineation of special types of urban territory and the preparation of maps, was under the supervision of Clarence E. Batschelet, Chief, Geography Division.

September 1951.

III

U. S. CENSUS OF POPULATION: 1950

Volume

- I Number of Inhabitants
- II Characteristics of the Population

Succeeding volumes will cover the following subjects:

Census Tracts, Nativity and Parentage, Nonwhite Population by Race, Persons of Spanish Surname, Institutional Population, Differential Fertility, Labor Force Characteristics, Occupation, Industry, Income, Internal Migration, Education, Characteristics of Families and Households.

U. S. CENSUS OF HOUSING: 1950

Volume

- I General Characteristics
- II Nonfarm Housing Characteristics
- III Farm Housing Characteristics
- IV Residential Financing
- V Block Statistics

Housing statistics for census tracts are to be included in the Population reports on census tracts.

DISTRICT OF COLUMBIA

Number of Inhabitants

The District.—The District of Columbia, formed from territory ceded by Maryland and Virginia, was established as the seat of the Federal Government in accordance with acts of Congress passed in 1790 and 1791. Its boundaries, as defined in 1791, included the present area, together with about 30 square miles in Virginia. In 1846 the area south of the Potomac River was retroceded to Virginia, leaving the District of Columbia with its present limits. Its population on April 1, 1950, according to the Seventeenth Census, was 802,178. The District has a land area of 61 square miles. In 1950 there was an average of 13,150.5 inhabitants per square mile as compared with an average of 10,870.3 in 1940.

In 1800 the present area of the District had a population of 8,144 (table 1). The population growth was rapid in the nineteenth century, and by 1900 the population was 278,718. In the twentieth century the rates of population growth ranged from 11.3 percent for the decade 1920 to 1930 to 36.2 percent for the following decade. The largest numerical increase came in the decade 1930 to 1940, when an increase of 176,222 was recorded. The increase of 139,087 between 1940 and 1950 was at the rate of 21.0 percent.

Usual place of residence.—According to usual Census practice, which dates back to 1790, each person enumerated in the 1950 Census was counted as an inhabitant of his usual place of residence or usual place of abode, which is generally construed to mean the place where he lives and sleeps most of the time. This place is not necessarily the same as his legal residence, voting residence, or domicile, although, in the vast majority of cases, these different bases of classification would be identical.

In the application of this rule, persons were not always counted as residents of the places in which they happened to be found by the census enumerators. Persons in places where guests usually pay for quarters (hotels, etc.) were enumerated on the night of April 11, and those whose usual place of residence was elsewhere were allocated to their homes. Visitors found staying in private homes, however, were not ordinarily interviewed there. Information on persons away from their usual place of residence was obtained from other members of their families, landladies, etc. If an entire family was expected to be away during the whole period of the enumeration, information on it was obtained from neighbors. A matching process was used to eliminate duplicate reports for persons who reported for themselves while away and were also reported by their families at home.

Persons in the armed forces quartered on military installations were enumerated as residents of the States, counties, and minor civil divisions in which their installations were located. Members of their families were enumerated where they actually resided. In the 1950 Census, college students living away from home were considered residents of the communities in which they were residing while attending college, rather than as persons temporarily absent from their parental homes as was the practice in 1940. In 1950 the crews of vessels of the American Merchant Marine in harbors of the United States were counted as part of the population of the ports in which their vessels were berthed on April 1,

1950. In 1940 such persons were treated as part of the population of the port from which the vessel operated. Inmates of institutions, who ordinarily live there for long periods of time, were counted as inhabitants of the place in which the institution was located; whereas patients in general hospitals, who ordinarily have short stays, were counted at, or allocated to, their homes. All persons without a usual place of residence were counted where they were enumerated.

Urban definition.—Under the urban definition established for use in the 1950 Census, the urban population comprises all persons living in (a) places of 2,500 inhabitants or more incorporated as cities, boroughs, towns,¹ and villages; (b) the densely settled urban fringe, including both incorporated and unincorporated areas, around cities of 50,000 or more; and (c) unincorporated places of 2,500 inhabitants or more outside any urban fringe. The remaining population is classified as rural. According to the urban definition used in previous censuses, the urban population comprises all persons living in incorporated places of 2,500 inhabitants or more and areas (usually minor civil divisions) classified as urban under special rules relating to population size and density.

In both definitions, the most important component of the urban territory is the group of incorporated places having 2,500 inhabitants or more. A definition of urban territory restricted to such places, however, would exclude a number of equally large and densely settled places, merely because they were not incorporated places. Under the old definition, an effort was made to avoid some of the more obvious omissions by the inclusion of the places urban under special rules. Even with these rules, however, many large and closely built-up places were excluded from the urban territory. To improve the situation in the 1950 Census, the Bureau of the Census set up, in advance of enumeration, boundaries for urban-fringe areas around cities of 50,000 or more and for unincorporated places outside urban fringes. All the population residing in urban-fringe areas and in unincorporated places of 2,500 or more is classified as urban according to the 1950 definition. (Of course, the incorporated places of 2,500 or more are urban in their own right.) Consequently, the special rules of the old definition are no longer necessary.

The change in the urban definition had no effect on the distribution of the population of the District by urban and rural residence. Since Washington, D. C., is considered coextensive with the District, the population of the District is classified as urban under both definitions by virtue of residence in an incorporated place of 2,500 inhabitants or more.

Incorporated and unincorporated places.—Political units recognized as incorporated places in the 1950 Census are those which are incorporated as cities, boroughs, towns, and villages with the exception that towns are not recognized as incorporated places in the New England States, New York, and Wisconsin.

The Bureau of the Census has delineated boundaries for the thickly settled urban fringe around cities of 50,000 or more and

¹ Except in New England, New York, and Wisconsin, where "towns" are minor civil divisions of counties and are not necessarily densely settled centers like the towns in other States.

DISTRICT OF COLUMBIA

has also delineated boundaries for unincorporated places of 1,000 or more which are densely settled population centers without corporate limits. Although there are unincorporated places within the urban fringe, it was not feasible to establish boundaries for such places and therefore they are not identified as separate places.

The count of urban places in the 1950 Census comprises all incorporated places of 2,500 or more regardless of location and unincorporated places of 2,500 or more which are located outside the urban-fringe areas. Incorporated places of less than 2,500 which lie in the urban fringe are not recognized as urban places.

Urbanized areas.—Washington, D. C., is the central city of the Washington, D. C., Urbanized Area, which had a population of 1,287,333. Of the 485,155 persons living in the urban fringe of the urbanized area, 253,423 were in the Maryland part and 231,732 were in the Virginia part. The 29 incorporated places in the urban fringe had 165,371 inhabitants, and the remaining 319,784 inhabitants of the urban fringe were living in unincorporated territory (table 9).

Each urbanized area contains at least one city with 50,000 inhabitants or more in 1940 or according to a special census taken since 1940, and some urbanized areas contain two or more cities of 50,000. Each urbanized area also includes the surrounding closely settled incorporated places and unincorporated areas that meet the criteria listed in the section below on "Urban fringe." Thus, the territory of an urbanized area may be classified into incorporated parts and unincorporated parts. (See Washington, D. C., Urbanized Area map.)

An urbanized area also may be divided into central city or cities and urban fringe as defined below.

Central cities.—Although an urbanized area may contain more than one city of 50,000 or more, not all cities of this size are necessarily central cities. The largest city of an area is always a central city. In addition, the second and third most populous cities in the area may qualify as central cities provided they have a population of at least one-third of that of the largest city in the area and a minimum of 25,000 inhabitants. The names of the individual urbanized areas indicate the central cities of the areas.

Urban fringe.—The urban fringe includes that part of the urbanized area which is outside the central city or cities. The following types of areas are embraced if they are contiguous to the central city or cities or if they are contiguous to any area already included in the urban fringe:

1. Incorporated places with 2,500 inhabitants or more in 1940 or at a subsequent special census conducted prior to 1950.
2. Incorporated places with fewer than 2,500 inhabitants containing an area with a concentration of 100 dwelling units or more with a density in this concentration of 500 units or more per square mile. This density represents approximately 2,000 persons per square mile and normally is the minimum found associated with a closely spaced street pattern.
3. Unincorporated territory with at least 500 dwelling units per square mile.
4. Territory devoted to commercial, industrial, transportation, recreational, and other purposes functionally related to the central city.

Also included are outlying noncontiguous areas with the required dwelling unit density located within $1\frac{1}{2}$ miles of the main contiguous urbanized part, measured along the shortest connecting highway, and other outlying areas within one-half mile of such noncontiguous areas which meet the minimum residential density rule.

WASHINGTON, D. C., URBANIZED AREA MAP

The Washington, D. C., Urbanized Area, for which statistics are shown in table 9, is depicted in the following map. The shaded areas, in combination, comprise the urbanized area. To assist in locating the exact external boundaries of the areas, each boundary feature (street segment, political boundary, or other) has been assigned a number. The boundary segments thus numbered are shown on the map and the features to which they apply are presented in the following key.

KEY TO NUMBERED BOUNDARY SEGMENTS

Main urbanized part: (1) Dist. 7, Bethesda—Dist. 10, Potomac line, (2) Rock Run, (3) branch of Rock Run, (4) MacArthur Blvd., (5) Persimmon Tree Rd., (6) Main St., (7) Dist. 7, Bethesda—Dist. 10, Potomac line, (8) MacArthur Blvd., (9) 10th St., (10) Cedar Lane, (11) unnamed street, (12) 8th St., (13) MacArthur Blvd., (14) Seven Locks Rd., (15) Tomlinson Rd., (16) 4th St., (17) Cabin Rd., (18) 3d St., (19) Ridge Rd., (20) 1st St., (21) MacArthur Blvd., (22) corporate limits of Glen Echo, (23) Wilson Lane, (24) Broxburn Dr., (25) Arondale Rd., (26) Laverock Lane, (27) Wilson Lane, (28) Selkirk Dr. and Selkirk Dr. extension, (29) property line of Bannockburn Country Club, (30) Barr Rd. and Barr Rd. extension, (31) Goldsboro Rd., (32) corporate limits of Glen Echo, (33) MacArthur Blvd., (34) Mohican Rd., (35) Wiscasset Rd., (36) Dahlonega Rd., (37) Mohican Rd., (38) Mohican Pl., (39) Massachusetts Ave., (40) Goldsboro Rd., (41) extension of Gloster Rd. and Gloster Rd., (42) Osceola Rd., (43) Massachusetts Ave., (44) Marilyn Dr., (45) Nanant St., (46) Madawaska Rd., (47) Waukesha Rd., (48) Wissioming Rd., (49) extension of Madawaska Rd., (50) Wyoming Rd., (51) Walhonding Rd., (52) MacArthur Blvd., (53) property line of Army Map Service, (54) Brooks Lane, (55) unnamed road, (56) Brooks Lane, (57) unnamed road, (58) Little Falls Branch, (59) River Rd., (60) Goldsboro Rd., (61) property line of Kenwood Country Club, (62) Goldsboro Rd., (63) Bradley Blvd., (64) Old Chester Rd., (65) Wilson Lane, (66) Rayborn Rd., (67) Roosevelt St., (68) Bradmoor Rd., (69)
